

IMPLEMENTING LECTURERS FEEDBACK

TASK 1

Lecturers Feedback	Implementation
Introductions should always include why the document exists, what it discusses, how it will discuss it and how the document will be concluded.	I included an introduction page in my updated Task 1 which states the outline and the overall flow of my research document.
Be careful of naming conventions, variable names and code quality standards.	I refractored my naming conventions to industry standards and made them more identifiable and readable.
Good work, I like the fact that this is an MD file, you can use Markup to get this file visually very appealing, have a look : https://github.com/adam-p/markdown-here/wiki/Markdown-Cheatsheet	I made reference to the site and redid my entire readme file which has been perfect in my task 2 submission.

TASK 2

Lecturers Feedback	Implementation
So I do need to relaunch the game after I entered my score, what if I wanted to keep my score safe and play more ?	I included in the readme a note about this specific feature and how it works
